ASX Release

Rail link construction commencement

Resource Generation has commenced activities in preparation for the construction of the 38 kilometre rail link to connect its Boikarabelo mine to the existing rail network. Construction will entail the pad for the base of the construction camp, associated access roads and further infrastructure for the mobilisation of site activities. This preparation work is expected to assist the timely construction of the rail link.

Paul Jury, managing director, said: 'We see this as an important step towards facilitating the total construction of the Boikarabelo mine. This start will also enable site operational procedures to be tested and optimised prior to the start of full scale construction.'

'We take this opportunity to remind shareholders that the 1 for 1 entitlement offer at \$0.22 per share closes on Tuesday, 23 July 2013.'
