ASX Release

NEMA approval received

Resource Generation Limited has received approval under the National Environmental Management Act (*NEMA*) for construction activities at its Boikarabelo mine. The approval enables the company to construct the mine, all the required mine infrastructure and the associated 36 kilometre rail link to the existing rail network.

This environmental authorisation was given by the Limpopo Department of Economic Development, Environment and Tourism (*LEDET*).

Paul Jury, managing director, said: 'We are very pleased to receive our development consent, which is the culmination of 15 months' close liaison and work with LEDET. As a life of mine approval, it clears a major milestone to ensure the long term value that the Boikarabelo mine can provide to all stakeholders and the local community.'

Once we have received our Integrated Water Use Licence and signed a contract with Transnet Freight Rail, we will then be able to proceed to finalise funding for project construction to commence.'
